

Top 20 enriched GO terms (p < 0.05) in down

GO terms

L-ascorbic acid binding
 palmitoyl-CoA hydrolase activity
 structural constituent of ribosome
 calcium-dependent protein binding
 cytosolic large ribosomal subunit
 nuclear matrix
 intercellular bridge
 dystrophin-associated glycoprotein complex
 dopaminergic synapse
 lipid droplet
 Wnt signalosome
 positive regulation of mitochondrial translation
 protein sumoylation
 synaptic vesicle maturation
 negative regulation of tyrosine phosphorylation of STAT protein
 response to heat
 nuclear-transcribed mRNA catabolic process, nonsense-mediated decay
 retinal cone cell development
 positive regulation of vasoconstriction
 calcium ion regulated exocytosis
 regulation of mitotic spindle assembly
